

# REMOTE SUPPORT & AUDITS

How PS Partnerships can help

Policies

Guideline

Law

Audit

Standard

PS Partnerships can remotely support your management system implementation, development and ongoing maintenance as an extended part of your internal auditing team. Our online support and remote auditing tools mean we can securely and confidentially receive and share data, make observations and conduct interviews without having to spend time on site.

In times of crisis and social distancing, remote audits protect the health and safety of your employees, safeguard your accreditations and allow for minimal disruption to your business.

## WHY HAVE A REMOTE AUDIT?

We have the technology for anytime, anywhere access. Audits, documentation reviews, non-conformances and interviews can all be carried out 'virtually'.

Remotely auditing large dispersed teams across multiple sites reduces travel time and costs. It also helps identify systematic deficiencies across sites that are not always immediately evident in single focus or single site audits.

PS Partnerships remote support can help you maintain your business continuity during times of crisis through continued objective evaluation of your processes and procedures.

## BENEFITS

- Support in any location
- Flexible approach
- Same high-quality service as our on-site options
- Time and cost savings
- Maintain business continuity
- Environmental benefits from a reduction in travel
- Risk control for staff
