

PLASTICS SUSTAINABILITY

How PS Partnerships can help

PS Partnerships know about plastics ... the good and the bad. Plastics has an important role to play in today's society but many businesses need to radically rethink how to integrate sustainability into their products and services.

We can help you navigate the confusing maze of legislation, regulations, targets and industry initiatives so that you improve the sustainability of your products and processes and reduce your impact on the environment.

MATERIALS

- Material selection
- Evaluating materials and suppliers (ISO 15343:2007)
- Risk assessment of using recycled content in your products and processes
- Supplier due diligence
- Process and cost optimisation
- Auditing processes and procedures

END OF LIFE

- Recyclability by design
- Using recycled materials in high-value products
- Environmental considerations
- Testing procedures and requirements
- Supplier audits
- Prevention, containment and clean-up strategies

LEGISLATION

- Strategies for sustainability
- Gap analysis
- Legislation scanning to ensure compliance
- Supply chain audits
- Sustainable Development Goals and Corporate Social Responsibility support
- Materiality assessments
